

Please reject NAB's petition 04-160. I want to see XM Radio extend its services into local services such as weather and traffic forecasting for my area. I subscribe to XM Radio because I want on demand information about traffic and weather. I do not want to listen for fifteen minutes on local stations to stupid conversations between disc jockies, mattress commercials, unpleasant music, and to "OH MY GODs!" from call in winners before I hear information that is important to me.

XM Radio is no threat to local commercial radio. There are adequate numbers of persons who will support the standard commercial fare. Those of us who are not satisfied with these stations should not be forced to support them.
